Fall 2012

Issue Date: November 30, 2012

406 ELTs Become Mandatory in 2013 for the Caribbean and Mexico!

If you fly into or out of the Caribbean and Mexico, this information is for you.

406 ELTs will be required for flight operations in the Bahamas by February 1 of 2013. And Mexico will require this mod by June 1, 2013.

Civil Aviation authorities in the Dominican Republic and The Caymans Islands have obtained a waiver from the 406 ELT requirement. The Dominican Republic waiver is indefinite, however the Cayman Islands waiver is only valid through December 1, 2013. It may or may not be extended after that.

If you operate in the regions noted, in order to be legal, you must install a 406 ELT.

Kitchener Aero Avionics will be pleased to help you update and meet this requirement. For additional information, consult our website – www.kitcheneraero.com. Or feel welcome to call Barry Aylward at 1-800-928-4669.
